Phone: +91 9579021582

OBJECTIVE

As a Final-year Engineering student specializing in Artificial Intelligence (AI) and Machine Learning (ML), I am passionate about exploring cutting-edge technologies and solving real-world problems through data-driven solutions.

EDUCATION

Bachelor of Technology – Computer Science & Engineering (AIML) 2024-2027

Sanjivani University (CGPA: 7.3)

Diploma in Mechatronics 2021-2024

Dr. Vitthalrao Vikhe Patil Institute of Engineering & Technology (Polytechnic)
(Percentage: 77.78%)

S.S.C. (State Board) 2020-2021

Jijamata Public School (Percentage:79.40%)

TECHNICAL SKILLS

Programming: Java, Python

AI & ML: Machine Learning, Deep Learning, Computer Vision, CNN, LSTM, OpenCV

Cloud & DevOps: Google Cloud Fundamentals, DevOps Fundamentals

Web Development: HTML, CSS, JavaScript

DataBase: MongoDB,MySQL

Tools: Git, GitHub, Power BI, MS Office, Arduino, ESP32

INTERNSHIPS

Google Cloud – Generative AI Sep 01- 2025

Worked with Vertex AI and prompt engineering– Generative AI under SmartInternz

Front-End Web Development Intern | IBM Skills Build & AICTE Sept 30-2025

Improved frontend development skills through project-based learning

CO-CURRICULAR ACTIVITY

- Finalist in National Level Hackathon, **TATA INNOVENT 2026** Organised by Tata Technologies, Pune.
- Participated Internal Smart India hackathon, Sanjivani University
- Participated at IITB FinEdge 2025 , Organized by ASPIRE IITB Research Park Foundation

CERTIFICATIONS

- | | |
|---|--|
| • Devops fundamental, Cloud fundamental | Issued by IBM Career Education Program |
| • Predictive Modeling with IBM SPSS Modeler | Issued by IBM Career Education Program |
| • IBM Watson Studio | Issued by IBM Career Education Program |
| • Exploratory data analysis, Acquiring Data | Futureskills prime |

PROJECTS

AI-Based Real-Time Driver Intent and Risk Prediction System

Tech Stack: Python, CNN, LSTM, OpenCV, Computer Vision

- Developed an AI-based system to detect driver drowsiness, distraction, and unsafe driving behaviour.
- Built a real-time risk prediction model for lane changes, sudden braking, and collision alerts.

Self-Charging Electric Vehicle (ABRIS)

Tech Stack: Arduino, CNG, BMS, RS-485, Sensors

- Designed a CNG-based range-extended EV with an Automatic Battery Rest & Isolation System (ABRIS).
- Implemented real-time battery monitoring and intelligent energy management using Arduino.

Real-Time Predictive Maintenance for Industrial IoT Using ML

Tech Stack: Python, Scikit-learn, Pandas, NumPy

- Developed an ML model to predict equipment failures using Industrial IoT sensor data.
- Performed data preprocessing, feature engineering, and model evaluation for early fault detection.

Student Management System

Tech Stack: Java, Java Swing, MySQL, JDBC

- Developed a desktop application for managing student records with CRUD operations.
- Integrated MySQL using JDBC and built a user-friendly Java Swing interface.

PERSONAL DETAILS

Date of Birth: 15 April 2005

Languages: English,Hindi,Marathi,German(Basic)
